

**TOGETHER
FOR BETTER**

WARNING:

Before using KNX-compatible daughterboard, upgrade the Element Controller with USB-key:

1. Power OFF
 2. Insert USB KEY in Element Controller
 3. Press and hold SERVICE button (top button)
 4. Power ON
 5. Wait until a LED blinks RED below the buttons
 6. Release SERVICE button: LED's start blinking fast
 7. Wait until 2 LED blinks slowly at the dipswitch
 8. Power OFF
 9. Unplug the USB KEY
- Ready to use!
